Diagnostic and Interventional Radiology (Diagn Interv Radiol) is a bimonthly periodical of the Turkish Society of Radiology and the content of the journal is available at <http://www.dirjournal.org/eng/Anasayfa> It is peer-reviewed and adheres to the highest ethical and editorial standards. The editors of the journal endorse the Editorial Policy Statements Approved by the Council of Science Editors Board of Directors (www.councilscienceeditors.org/services/draft_approved.cfm). The journal is in compliance with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals published by the International Committee of Medical Journal Editors (updated December 2014, www.icmje.org).

First ten volumes of Diagnostic and Interventional Radiology have been published in Turkish under the name of Tanısal ve Girişimsel Radyoloji (Index Medicus® abbreviation: Tani Girişim Radyol), the current title's exact Turkish translation.

© All rights of the articles published in Diagnostic and Interventional Radiology and displayed online at www.dirjournal.org are reserved by the Turkish Society of Radiology.

Diagnostic and Interventional Radiology is indexed in SCI Expanded, PubMed/MEDLINE, TUBITAK ULAKBİM TR Index, DOAJ, HINARI, EMBASE, Scopus.

Turkish Society of Radiology is one of the foremost medical specialty organizations in Turkey. It was formed by the merger of the two main radiology societies of Turkey, one of which was founded in 1924. The Society is based in Ankara, Turkey.

Instructions to Authors

Overview

Diagnostic and Interventional Radiology (Diagn Interv Radiol) is a medium for disseminating scientific information based on research, clinical experience, and observations pertaining to diagnostic and interventional radiology. The journal is the double-blind peer-reviewed, international, bimonthly, open-access publication organ of the Turkish Society of Radiology. *Diagnostic and Interventional Radiology* is currently indexed by Science Citation Index Expanded (2016 IF: 1.892) and PubMed MEDLINE.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Committee of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), and the European Association of Science Editors (EASE).

Statements or opinions expressed in the manuscripts published in *Diagnostic and Interventional Radiology* reflect the views of the author(s) and not the opinions of the editors, the editorial board, or the publisher; the editors, the editorial board, and the publisher disclaim any responsibility or liability for such materials. The final responsibility in regard to the published content rests with the authors.

Submitting manuscripts

- Authors should submit manuscripts using the online peer review system that can be accessed through the DIR web site (www.dirjournal.org) or using the direct link at <https://mc04.manuscriptcentral.com/dir>.
- Detailed DIR Author Guidelines can be viewed or downloaded from DIR web site (www.dirjournal.org).
- *Diagnostic and Interventional Radiology* requires authors to submit an Authorship Contributions Form during the initial submission which is available for download through the journal's web page.
- Submitted manuscripts should be original contributions; they should not contain any previously published data or be under consideration by another journal.

- Authors are required to make a full statement at the time of submission about all prior reports and submissions that might be considered duplicate or redundant publication and mention any previously published abstracts for meeting presentations that contain partial or similar material in the cover letter.
- Authors must obtain written permission from the copyright owner to reproduce previously published figures, tables, or any other material in both print and electronic formats and present it during submission.

You may find checklists here:

DIR Submission Checklist

DIR Biostatistical Reporting Guideline

Copyright transfer

Diagnostic and Interventional Radiology requires each submission to be accompanied by a Copyright Transfer Form which can be downloaded from <http://www.dirjournal.org>. By signing the copyright agreement, the authors hand over the copyright of their work to the Turkish Society of Radiology. In case of a rejection decision, copyright of the manuscript will be returned to the authors.

Conflict of interest disclosure

Diagnostic and Interventional Radiology requires and encourages the authors and the individuals involved in the evaluation process to disclose any existing or potential conflicts of interests including financial, consultant, institutional, and other relationships that might lead to bias or a conflict of interest. Each contributing author is required to electronically fill in the *ICMJE Form for Disclosure of Potential Conflicts of Interest* (available at www.icmje.org) and the forms must be submitted during the initial submission.

Initial evaluation and the peer review process

Manuscripts submitted to *Diagnostic and Interventional Radiology* will first go through a technical evaluation process where the editorial office staff will ensure that the manuscript is prepared and submitted in accordance with the journal's guidelines. Submissions that do not conform to the journal's guidelines will be returned to the submitting author with technical correction requests.

All submissions are screened by a similarity detection software (iThenticate by CrossCheck), and those with an overall similarity index of greater than 20%, or duplication rate at or higher than 5% with a single source are returned to the authors without further evaluation along with the similarity report.

Manuscripts meeting the requirements mentioned in journal's guideline will go under the review process. The initial review will be performed by Editor-in-Chief and the Section Editor, which include the evaluation of the manuscript for its originality, importance of the findings, scientific merit, interest to readers and compliance with the policy of the journal in force. Manuscripts with insufficient priority for publication are not sent out for further review and rejected promptly at this level to allow the authors to submit their work elsewhere without delay.

Manuscripts that pass through the initial review are sent to peer review, which is performed in a blinded manner by at least two external and independent reviewers. During the review process, all original articles are evaluated by at least one senior consultant of statistics for proper handling and consistency of data, and use of correct statistical method. The Section Editor and / or Editor-in-Chief are the final authority in the decision-making process for all submissions.

Permissions and reprints

Turkish Society of Radiology handles all requests to reproduce material from *Diagnostic and Interventional Radiology*. For your convenience, please fill in the permission request form, available for download at the journal's webpage and e-mail a scanned version to info@dirjournal.org.

Please ensure that you include the full reference of the material you want to use (i.e., year of publication, volume, issue and page numbers, author names, figure numbers where appropriate). Turkish Society of Radiology also requires a detailed overview of how you intend to use the material (i.e., in a book or a journal) and when.

ABDOMINAL IMAGING

- 286 **Original Article.** Ectopic opening of common bile duct into the duodenal bulb: magnetic resonance cholangiopancreatography findings. *Ayşe Erden, Diğdem Kuru Öz, İlhan Erden*
- 294 **Original Article.** Comparison of spin-echo echo-planar imaging magnetic resonance elastography with gradient-recalled echo magnetic resonance elastography and their correlation with transient elastography. *Jin Woo Yoon, Eun Sun Lee, Hyun Jeong Park, Sung Bin Park, Young Youn Cho, Stephan Kannengiesser, Joonho Hur*
- 301 **Original Article.** A new proposal of an ultrasonic imaging model for predicting overall and progression-free survival in patients with primary hepatocellular carcinoma. *Xiao-Yun Li, Lin-Lin Wang*

ARTIFICIAL INTELLIGENCE AND INFORMATICS

- 312 **Original Article.** Multi-parametric MRI-based peritumoral radiomics on prediction of lymph-vascular space invasion in early-stage cervical cancer. *Linpeng Cui, Tao Yu, Yangyang Kan, Yue Dong, Yahong Luo, Xiran Jiang*

BREAST IMAGING

- 322 **Original Article.** Application of the Kaiser score by MRI in patients with breast lesions by ultrasound and mammography. *Qibin Wang, Fengli Fu, Yao Chen, Di Yang, Jianjun Zhang, Huajun Yu, Lina Su*
- 329 **Original Article.** Diffusion tensor imaging and diffusion-weighted imaging on axillary lymph node status in breast cancer patients. *Nazmi Kurt, Busem Binboga Kurt, Ugur Gulsaran, Burak Uslu, Ahmet Onur Celik, Necdet Sut, Ebru Tastekin, Derya Karabulut, Nermin Tuncbilek*

CHEST IMAGING

- 337 **Original Article.** Factors influencing the total procedure time of CT-guided percutaneous core-needle biopsies of lung nodules: a retrospective analysis. *Tyler Sargent, Nathan Kolderman, Girish B. Nair, Michelle Jankowski, Sayf Al-Katib*

INTERVENTIONAL RADIOLOGY

- 344 **Original Article.** Imaging findings as predictors of the site of bleeding in patients with hemoptysis: Comparison between split-bolus dual-energy CT angiography and digital subtraction angiography. *Pankaj Meena, Ashu Seith Bhalla, Ankur Goyal, Priyanka Naranje, Korukanti Pradeep Kumar*
- 352 **Original Article.** Safety and feasibility of single use cholecystoscopy for guiding laser or mechanical cholelithotripsy, and mechanical cholelithotomy. *Nariman Nezami, Igor Latich, Arun Chockalingam, Melih Arici, Jessica Lee, Juan Carlos L. Perez Lozada, Todd Schlachter*
- 359 **Original Article.** Bronchial and non-bronchial systemic artery embolization with transradial access in patients with hemoptysis. *Yuna Lee, Myungsu Lee, Saebeom Hur, Hyo-Cheol Kim, Hwan Jun Jae, Jin Wook Chung, Jin Woo Choi*
- 364 **Original Article.** Effect of acquisition techniques, latest kernels, and advanced monoenergetic post-processing for stent visualization with third-generation dual-source CT. *Christoph Artzner, Gerd Grözinger, Manuel Kolb, Sven S. Walter, Sergios Gatidis, Malte N. Bongers*
- 370 **Original Article.** Outcomes of endovascular treatment of thoracic aorta pathologies: 10-year single-center results. *Mustafa Emre Akin, Koray Akkan, Abdullah Özer, Erhan Turgut Ilgit, Baran Önal, Gürsel Levent Oktar*
- 376 **Original Article.** Operator radiation dose during trans-hepatic arterial chemoembolization: different patients' positions via transradial or transfemoral access. *Hailin Jiang, Yinan Chen, Huaqiang Liao, Yafeng Gu, Xiaoxi Meng, Weihua Dong*
- 383 **Technical Note** Iatrogenic arterio-biliary fistula and peripheral hepatic artery pseudoaneurysm after transjugular liver biopsy: complication management using a microvascular plug. *Felix Frenzel, Peter Fries, Arno Buecker, Alexander Massmann*
- 387 **Erratum**
