Diagnostic and Interventional Radiology (Diagn Interv Radiol) is a bimonthly periodical of the Turkish Society of Radiology and the content of the journal is available at <http://www.dirjournal.org/eng/Anasayfa> It is peer-reviewed and adheres to the highest ethical and editorial standards. The editors of the journal endorse the Editorial Policy Statements Approved by the Council of Science Editors Board of Directors (www.councilscienceeditors.org/services/draft_approved.cfm). The journal is in compliance with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals published by the International Committee of Medical Journal Editors (updated May 2022, www.icmje.org).

First ten volumes of Diagnostic and Interventional Radiology have been published in Turkish under the name of Tanısal ve Girişimsel Radyoloji (Index Medicus® abbreviation: Tani Girişim Radyol), the current title's exact Turkish translation.

Diagnostic and Interventional Radiology is an open access publication, and the journal's publication model is based on Budapest Open Access Initiative (BOAI) declaration. All published content is available online, free of charge at <https://www.dirjournal.org/>. Authors retain the copyright of their published work in Diagnostic and Interventional Radiology. The journal's content is licensed under a Creative Commons Attribution-NonCommercial (CC BY-NC) 4.0 International License which permits third parties to share and adapt the content for non-commercial purposes by giving the appropriate credit to the original work.

Diagnostic and Interventional Radiology is indexed in Pubmed/Medline, Pubmed Central, TUBITAK ULAKBIM TR Index, HINARI, EMBASE, CINAHL, Scopus, Gale and CNKI.

Turkish Society of Radiology is one of the foremost medical specialty organizations in Turkey. It was formed by the merger of the two main radiology societies of Turkey, one of which was founded in 1924. The Society is based in Ankara, Turkey.

Instructions to Authors

Overview

Diagnostic and Interventional Radiology (Diagn Interv Radiol) is a medium for disseminating scientific information based on research, clinical experience, and observations pertaining to diagnostic and interventional radiology. The journal is the double-blind peer-reviewed, international, bimonthly, open-access publication organ of the Turkish Society of Radiology. *Diagnostic and Interventional Radiology* covered by SCI Expanded (IF: 3.346; 5-year IF: 3.132), and indexed in Pubmed/Medline, Pubmed Central, TUBITAK ULAKBIM TR Index, HINARI, EMBASE, CINAHL, Scopus, Gale and CNKI.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Committee of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), and the European Association of Science Editors (EASE).

Statements or opinions expressed in the manuscripts published in *Diagnostic and Interventional Radiology* reflect the views of the author(s) and not the opinions of the editors, the editorial board, or the publisher; the editors, the editorial board, and the publisher disclaim any responsibility or liability for such materials. The final responsibility in regard to the published content rests with the authors.

Submitting manuscripts

- Authors should submit manuscripts using the online peer review system that can be accessed through the DIR web site (www.dirjournal.org) or using the direct link at <https://mc04.manuscript-central.com/dir>.
- Detailed DIR Author Guidelines can be viewed or downloaded from DIR web site (www.dirjournal.org).
- *Diagnostic and Interventional Radiology* requires authors to submit an Authorship Contributions Form during the initial submission which is avail-

able for download through the journal's web page.

- Submitted manuscripts should be original contributions; they should not contain any previously published data or be under consideration by another journal.
- Authors are required to make a full statement at the time of submission about all prior reports and submissions that might be considered duplicate or redundant publication and mention any previously published abstracts for meeting presentations that contain partial or similar material in the cover letter.
- Authors must obtain written permission from the copyright owner to reproduce previously published figures, tables, or any other material in both print and electronic formats and present it during submission.

You may find checklists here:

DIR Submission Checklist
DIR Biostatistical Reporting Guideline

Open access statement

Diagnostic and Interventional Radiology each submission to be accompanied by a Copyright Agreement and Acknowledgement of Authorship form (available for download <https://www.dirjournal.org/>). By signing this form, authors retain the copyright of their work and agree that the article, if accepted for publication by *Diagnostic and Interventional Radiology* will be licensed under a Creative Commons Attribution-NonCommercial (CC BY-NC) 4.0 International License which permits third parties to share and adapt the content for non-commercial purposes by giving the appropriate credit to the original work.

Conflict of interest disclosure

Diagnostic and Interventional Radiology requires and encourages the authors and the individuals involved in the evaluation process to disclose any existing or potential conflicts of interests including financial, consultant, institutional, and other relationships that might lead to bias or a conflict of interest. Each contributing author is required to electronically fill in the ICMJE Form for Disclosure of Potential Conflicts of Interest (available at [\[mje.org\]\(http://www.icmje.org\)\) and the forms must be submitted during the initial submission.](http://www.ic-</p>

<div data-bbox=)

Initial evaluation and the peer review process

Manuscripts submitted to *Diagnostic and Interventional Radiology* will first go through a technical evaluation process where the editorial office staff will ensure that the manuscript is prepared and submitted in accordance with the journal's guidelines. Submissions that do not conform to the journal's guidelines will be returned to the submitting author with technical correction requests.

All submissions are screened by a similarity detection software (iThenticate by CrossCheck), and those with an overall similarity index of greater than 20%, or duplication rate at or higher than 5% with a single source are returned to the authors without further evaluation along with the similarity report.

Manuscripts meeting the requirements mentioned in journal's guideline will go under the review process. The initial review will be performed by Editor-in-Chief and the Section Editor, which include the evaluation of the manuscript for its originality, importance of the findings, scientific merit, interest to readers and compliance with the policy of the journal in force. Manuscripts with insufficient priority for publication are not sent out for further review and rejected promptly at this level to allow the authors to submit their work elsewhere without delay.

Manuscripts that pass through the initial review are sent to peer review, which is performed in a blinded manner by at least two external and independent reviewers. During the review process, all original articles are evaluated by at least one senior consultant of statistics for proper handling and consistency of data, and use of correct statistical method. The Section Editor and / or Editor-in-Chief are the final authority in the decision-making process for all submissions.

ABDOMINAL IMAGING

- 388 **Original Article.** Prognostic role of iodine values for gastric cancer after neoadjuvant chemotherapy: a strong independent prognostic factor. *Yang Zhang, Junfa Chen, Fei Yuan, Benyan Zhang, Bei Ding, Huan Zhang*
- 396 **Original Article.** Prospective assessment of VI-RADS score in multiparametric MRI in bladder cancer: accuracy and the factors affecting the results. *Ural Oğuz, Tümay Bekçi, Ercan Öğreden, Serdar Aslan, Aslıhan Duman, Erhan Demirelli, Demet Şengül, Doğan Sabri Tok, Osman Çağatay Çiftçi, Alptekin Tosun*
- 403 **Original Article.** Apparent diffusion coefficient histogram analysis for predicting neoadjuvant chemoradiotherapy response in patients with rectal cancer. *Andelib Babatürk, Ayşe Erden, İbrahim Ethem Geçim*
- 410 **Original Article.** CT and clinical features for distinguishing endophytic clear cell renal cell carcinoma from urothelial carcinoma. *Xin Chen, Yidi Chen, Yiwu Leia, Fuling Huang, Cheng Tanga, Liling Longa*
- 418 **Original Article.** Speed of sound index for liver steatosis estimation: a reliability study in normal subjects. *Ilias Gatos, Petros Drazinios, Thanasis Loupas, Spyros Yarmenitis, John Koskinas, Pavlos S. Zoumpoulis*
- 428 **Review Article.** Diagnostic value of magnetic resonance imaging features of microvascular invasion in hepatocellular carcinoma: a meta-analysis. *Lung Wang, Mimi Jia, Xiaoling Wen, Jiang Shen, Hanfeng Yang*

ARTIFICIAL INTELLIGENCE AND INFORMATICS

- 441 **Original Article.** Radiomics signature for predicting postoperative disease-free survival of patients with gastric cancer: development and validation of a predictive nomogram. *Shuguang Shi, Zhongchang Miao, Ying Zhou, Chunling Xu, Xue Zhang*
- 450 **Review.** Key concepts, common pitfalls, and best practices in artificial intelligence and machine learning: focus on radiomics. *Burak Koçak*

BREAST IMAGING

- 463 **Original Article.** The value of adjacent vessel sign in malignant breast tumors. *Ezra Çetinkaya, Şeyma Yıldız, Hafize Otçu, Rasul Sharifov, Fatma Çelik Yabul, Alpay Alkan*

CARDIOVASCULAR IMAGING

- 470 **Original Article.** Denoising using deep-learning-based reconstruction for whole-heart coronary MRA with sub-millimeter isotropic resolution at 3 T: a volunteer study. *Toshiya Kariyasu, Haruhiko Machida, Sanae Takahashi, Keita Fukushima, Tatsuya Yoshioka, Kenichi Yokoyama*

INTERVENTIONAL RADIOLOGY

- 478 **Original Article.** Efficacy and safety of splenic artery embolization for intractable ascites using Amplatzer vascular plug versus coil after living donor liver transplantation. *Chih-Ying Lee, Wei-Xiong Lim, Chao-Long Chen, Chee-Chien Yong, Chun-Yen Yu, Leo Leung-Chit Tsang, Hsien-Wen Hsu, Yu-Fan Cheng, Hsin-You Ou*
- 486 **Original Article.** Image-guided embolization of arteriovenous malformations of the hand using Ethylene-vinyl Alcohol Copolymer. *Vanessa F. Schmidt, Max Masthoff, Constantin Goldann, Denis Ehrh, Sinan Deniz, Osman Öcal, Max Seidensticker, Jens Ricke, Michael Köhler, Richard Brill, Walter A. Wohlgemuth, Moritz Wildgruber*
- 495 **Technical Note.** Balloon-occluded middle adrenal artery embolization and percutaneous microwave ablation of a metastatic adrenal tumor from renal cell carcinoma. *Steven D. Kao, Siddharth A. Padia, John M. Moriarty, Ravi N. Srinivasa*

MODALITY-BASED (US, CT, MRI, PET-CT) IMAGING

- 498 **Original Article.** Role of ¹⁸F-FDG PET/CT for detection of recurrence and metastases in renal cell carcinoma— are we underusing PET/CT? *Melvika Pereira, Chirag B. Punatar, Natasha Singh, Sharad N. Sagade*

NEURORADIOLOGY

- 503 **Review.** The changing landscape in epilepsy imaging: Unmasking subtle and unique entities. *Mehmet E. Adin, David Durand, William B. Zucconi Anita J. Huttner, Dennis D. Spencer, Richard A. Bronen*

PEDIATRIC RADIOLOGY

- 516 **Original Article.** Increased ocular wall thickness and decreased globe volume in children with mucopolysaccharidosis type VI. *Ozlem Ozkale Yavuz, Ercan Ayaz, Yılmaz Yıldız, Ayca Akgoz Karaosmanoglu, Elif Bulut, H. Serap Kalkanoglu Sivri, Kader K. Oguz*
